SKILLS

Programming Languages: C/C++ , Java , JavaScript , Python , TypeScript , Golang

Technologies & Tools:: React Native , Expo , eas , React Js , Git/Github , Node , Firebase Functions/Firestore , MongoDB , CSS , SQL , RestApi , GraphQL , CI/CD (Jenkins) , UAT Testing, MVC Architecture , Web socket , DSA (350+ questions)

EXPERIENCE

Fitslist : App Developer

React Native , Next : TypeScript

July 2024 – Present

Netherlands (Remote)

- Utilized the MVC architecture in React Native to manage business-side logic, including the implementation of a scanner/camera module for QR code scanning to drive workflow processes.
- Instagram OAuth 2.0, Deep linking redirect back to app.
- Established a socket connection for support chat, enhancing real-time communication within the app.
- Contributed to the development of the company's admin portal using Mantine UI, ensuring design alignment with company standards, configuring the REST API, and working on Next.js.
- Developed a custom calendar module for the admin portal to display active user data based on selected days, improving user activity tracking and analysis.

Curomates : Software Development Intern

React Native : JavaScript

March 2024 – July 2024

Mumbai , India

- Client App Development : Designed and implemented the user authentication system, including the signup and signin features. Developed a comprehensive badges reward system to enhance user engagement , Push notifications , Dynamic add banners
- Backend Contributions : Contributed to the development and optimization of backend server code, improving overall application performance and scalability. Worked on various features and bug fixes, ensuring robust and reliable backend operations.
- Curomates for Professionals : Assisted in the development of the 'Curomates for Professionals' app, contributing to both frontend and backend components.

IdeaToReality : App Developer

React Native : TypeScript

Dec 2023 – March 2024

Delhi , India

- During my internship at IdeaToReality , I worked on the project "Qalb," utilizing the MVC structure to ensure that the app's architecture matched the design requirements provided by the Qalb team. This experience allowed me to enhance my skills in writing clean and optimized code.

PROJECTS

- **Law4Everyone (Dec 2023 – Present):** Introducing our cutting-edge legal assistance app tailored specifically for the Indian market. Our platform boasts a sophisticated Chatbot capable of addressing legal queries in multiple regional languages, ensuring seamless communication for users nationwide. Beyond advice, we offer a streamlined interface for connecting clients with top-notch advocates, facilitating smooth case discussions and document sharing.
- Our business model charges advocates based on the cases they acquire through the app, while clients access services free of charge, paying only for the legal assistance received.. Say goodbye to legal uncertainties with our user-friendly solution – download now and navigate the Indian legal landscape with confidence.
- Tech Library used... React Native , Expo , react native libraries , Chat gpt api , Node js, Jws tokens ,mondoDb , Recommendation system ML algorithms
- **Your Activity Tracker** A React Todo App that serves as a user-friendly platform for efficiently managing daily tasks. Users can seamlessly log in or sign up, allowing them to add and organize their todos effortlessly. The app provides a convenient way to track uncompleted tasks, ensuring users stay on top of their daily responsibilities. Additionally, it offers a profile graph feature that summarizes monthly activity based on completed and remaining tasks. Tech Library used.. React ,React Native , Expo ,expo router , MongoDB ,Express , Node , Redux , Victory Native (for graph plotting).
