EXPERIENCE

Nourisho App *(Core Mobile Application Developer)*   December 2024 – Present | Bangalore, India

- **Built the Nourisho mobile app from scratch** as part of the core team, delivering a stable product that scaled to **30k+ active users** with **near-zero crashes** over 5 months.
- Implemented **secure authentication** and **guest user flows** with optimized session handling, improving onboarding speed and reliability.
- Developed a **backend-driven**, modular **Home screen** and **bottom navigation** architecture that enabled rapid feature rollouts and reduced future development overhead.
- Integrated analytics platforms **Google Analytics**, **Meta**, and **NetCore** with detailed event tracking that provided actionable insights for product decisions.
- Engineered a **robust order-tracking** and **location setup** system using **Google Maps**, covering edge cases such as permission states, background/foreground transitions, and map-based address selection to ensure a seamless delivery experience. View on Play Store

Cookr Food App (1 Lakh+ MAU) *(Software Engineer Mobile)*   December 2024 – Present | Bangalore, India

- **Transformed the legacy Cookr app** by upgrading React Native from **0.71 to 0.77 (New Architecture)**, involving extensive **native-side refactoring**, compatibility fixes, and performance tuning resulting in a **20% improvement in rendering time** and a **73% reduction in app crashes** (Google Analytics & Crashlytics).
- Played a key role in developing the new **Storefront** section within two months, increasing user engagement and enabling new revenue-oriented workflows.
- Implemented advanced **caching mechanisms** to reduce load times and enhance perceived responsiveness.
- Built the complete **order flow** from cart addition to payment success/failure handling, ensuring a seamless and reliable transaction experience. View on Play Store

Zero Moblt *(Freelancing MVP Developer)*   March 2025 – May 2025 | Remote

- Led the development of the Android and iOS apps from scratch, coordinating a small team to deliver a complete and functional MVP within a tight timeline.
- Integrated **AWS Cognito** for secure authentication and built a real-time **trip-tracking feature** using Google Maps SDK, enabling parents to monitor their child's trip live from the app.

Fitslist App Developer (Under Agency) *(React Native)*   July 2024 – November 2024 | Netherlands (Remote)

- Implemented a dual authentication system for clients and businesses, including **Instagram OAuth 2.0** and cross-platform **deep linking** for seamless redirection back into the app.
- Built real-time communication using **WebSocket-based messaging** with image sharing, and developed admin-facing features in the Next.js portal using Mantine UI and REST API integrations.

PROJECTS

Law4Everyone

- Developed a multilingual legal-assistance app with an **AI-powered chatbot** capable of answering legal queries across multiple Indian regional languages, improving accessibility for users nationwide.
- Built a secure platform enabling clients to connect with advocates for case discussions and document sharing, using **React Native, Expo, Node.js, JWT, MongoDB** and **ML-based recommendation algorithms**. Product Demo

EDUCATION

IIIT Dharwad *(CGPA : 7.71)*   Aug 2021 May 2025 | Dharwad , Karnataka

SKILLS

Technologies & Tools / Languages: C++, JavaScript, TypeScript, React, React Native, Expo, Git/GitHub, Node.js, Firebase, MongoDB, CSS, SQL, REST APIs, MVC Architecture, WebSockets, AWS, OOPs, OS, DSA (400+ questions)
